MEDIX

Durability And Security

Organizations and employees entrust all their important documents and items safely stored and kept. The storage cabinet should at least provide the trust, in term of it's durability, security and safe to use. From the door hinges, locking mechanism are designed for outstanding reliability, safety and security.

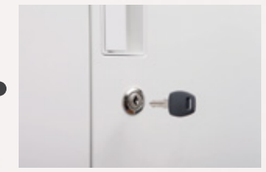
More space allocated for all files types.

Conveniently within the shelves space. All shelvings could be easily adjusted to accomodate for both large or small items.

The door handle is designed in a simple rectangular design for easy grip when opening and closing of the door and drawer.

The door hinges ensure the door is swing smoothly during the motion of opening and closing of the door.

Inside the cabinet also comes with shelves position indicator for easy adjustment of shelves.



Exchangable key lock.
All cabinets comes with a master key.
You need not to worry if you lose your key.

The lateral filing drawer is built-in with smooth roller and rail movement for easy and smooth opening and closing.

The drawer also comes with optional file divider for better management of files and documents.

MEDIX

Storage Space Accomodate to Surrounding Architecture

Additional storage area for additional documents.
Sliding cabinet system (Business-saver) is the best solution in storing high volume of documents. Setting the cabinets system along the wall, will provide the efficiency in the office space. It helps to create a well-balanced work environment between the storage and work area.

The business-saver unit can be extended by adding additional sliding system by creating more storage if needed.
